re: the August filing

tue 10:14

Your appointment was filed on the 12th and the two SDR roles went up on the 19th. Usually means the next quarter's number is already at risk.

We build the first 200 conversations for teams in exactly that spot. If the number matters more than the headcount right now, worth a look at how the sequence would read for Northwind?

PS - the registry says three of your competitors filed the same appointment this quarter.
